

TEJAS SATISH CHOUDHAR

9146161922 | tejaschoudhar5@gmail.com | [LinkedIn](#) | [GitHub](#) | [LeetCode](#) | [HackerRank](#) | [Kaggle](#)

AI/ML undergraduate with hands-on experience building CNN, NLP, and full-stack applications, from data pipelines to deployed user interfaces.

EDUCATION

Pimpri Chinchwad College of Engineering (PCCOE), Pune

2024 – 2028

B.Tech in Computer Science Engineering (AI & ML) • CGPA: 7.16 / 10

MHT-CET: 97.98 percentile • JEE Main: 90.84 percentile

HSC (12th, Maharashtra Board), 2024: 67.67% • SSC (10th, Maharashtra Board), 2022: 74.8%

SKILLS

Languages: Python (Proficient), C++, Java, Kotlin, JavaScript, SQL

Data Science & Web: Machine Learning, NLP, HTML5, CSS3, JavaScript, MySQL

Tools: Google Colab, VS Code, Git/GitHub, Firebase

Core Concepts: OOPs, Data Structures, DBMS, Computer Networks, Theory of Computation, Software Engineering, Embedded AI, Information Security

PROJECTS

AgroVision – Crop Disease Detection using Image Recognition — Python, CNN, Machine Learning, Image Processing

- Designed and trained a Convolutional Neural Network (CNN) for crop disease classification, applying image preprocessing and data augmentation to improve model robustness.
- Built an end-to-end ML pipeline covering data cleaning, model training, validation, and performance evaluation.
- Integrated prediction logic with a user-facing interface for real-time disease detection.

Fake Job Detection — Python, Scikit-learn, TF-IDF, NLP

- Developed a fake job posting detector using TF-IDF text vectorization combined with multiple machine learning models to classify listings as real or fraudulent.
- Compared model performance to identify the most reliable classifier for distinguishing genuine postings from scams.

Human Leveling System — Python, JavaScript, Firebase

- Built a personal discipline-tracking app that logs daily routines — study, workouts, and goals — to help maintain consistency in real life.
- Designed a gamified leveling mechanic that rewards consistent habit completion to keep users motivated.

TechPath — Web Development, AI Chatbot Integration

- Built a guidance website for AI/ML engineering students curating free and paid certifications, YouTube resources, and notes.
- Added higher-study guidance content and an integrated AI chatbot to answer student queries in real time.
